

Copying Photos from a Camera to Computer

Tutorial #14

It is extremely convenient in this day and age to have a digital camera. With a digital camera you can organize all your photos for easy retrieval, upload digital photos to the Internet, photoshop images and print out quality photographs. The three things you will need are:

- The camera cord
- The camera
- A computer (installed software if needed)

Note: To better understand your device, read the manual

Copying Digital Photos to a Computer

- (1) Insert your cable into the USB drive of your computer
- (2) Insert the other side into your camera
- (3) Turn on your camera
- (4) The "D: Drive" box will appear, left click on "Copy Pictures to a folder on my computer..."
- (5) Left click on "OK"
- (6) The "Scanner & Camera Wizard" will appear, left click on "next" to continue
- (7) The "Choose Pictures to Copy" page will appear, follow the instruction below
- (8) When you are ready to continue, left click on "next"
- (9) The "Picture Name & Destination" page will appear, select the chosen location and re-name the folder
- (10) When you are ready to continue, left click on "next"
- (11) The selected photos will begin to copy onto your computer
- (12) Wait until the computer tells you it is complete before you unplug your device
